TECHNICAL SKILLS

- Python
- C++
- C
- Kali Linux
- Cloud Computing (Azure)
- Data Structures & Algorithms
- Machine Learning Basics
- VS Code / Git

INTERPERSONAL SKILLS

- Communication
- Teamwork
- Problem-solving
- Time management
- Adaptability
- Quick learning

INTERESTS

- AI & Technology
- Coding
- Problem-solving
- Modeling
- Baking

LANGUAGES

- English
- Hindi

FALAK BAHARWANI

SOFTWARE ENGINEER

PROFESSIONAL SUMMARY

Motivated B.Tech CSE (AI) student at Chandigarh University with strong foundations in Python, C, and C++, and a solid grasp of data structures, algorithms, and core computer science concepts. Passionate about software development and applied AI/ML, with hands-on project experience building predictive models and full-stack tools. Microsoft Azure-certified, detail-oriented, and eager to contribute to real-world engineering teams.

EDUCATION

Bachelor of Engineering, Computer Science (AI)
Chandigarh University | 2025 – 2029

Senior Secondary (XII)
St. Stephen School, Ratlam, M.P. | 2024 – 2025

Matriculation (X)
St. Joseph Convent School, Ratlam, M.P. | 2022 – 2023

PROJECTS

Stock Market Prediction Website

- Developed a web-based Stock Market Prediction Dashboard that analyzes historical stock data and generates price predictions using machine learning models.
- Built interactive charts and market trend visualizations to help users understand potential stock movements.
- Implemented the prediction engine and backend logic in Python using machine learning models trained on historical stock data.
- Designed the front-end interface with HTML/CSS and JavaScript to present predicted prices and trends through interactive data visualizations.

Basic AI/ML Mini Project (Learning Stage)

- Developed a beginner-level model for simple prediction and classification tasks using Python and core ML libraries.
- Gained hands-on understanding of the end-to-end machine learning workflow, from data preparation to evaluation.

Brain Barter

- Designed a platform concept for exchanging knowledge and skills between users, connecting learners with contributors through an interactive system.
- Implemented core logic in Python with a basic web interface, improving skills in problem-solving, system design, and user-focused thinking.

CERTIFICATIONS & AWARDS

Microsoft Certified: Azure Fundamentals (AZ-900)
Covers cloud concepts, core Azure services, pricing, and governance fundamentals.

ACHIEVEMENTS

- Ranked 7th in India, UCMAS Mental Arithmetic Competition.
- Recipient of the Bharti Airtel Scholarship.
- Recognized for strong academic performance and consistency in studies.
